Objective

C# and SQL Developer with 4+ years of hands-on experience designing, developing, and optimizing robust backend systems and databases. Skilled in writing clean, efficient code, managing complex data workflows, and integrating scalable solutions. Proven ability to collaborate with cross-functional teams to deliver impactful software in Agile environments.

Experience

- **Maruti Computers P.Ltd** 15/02/2021 -
Software Programmer
At Maruti Computer Pvt Ltd, I contributed to the development and maintenance of software solutions over a span of 4 years and 8 months. During my tenure, I actively participated in two significant projects, leveraging my skills in software programming and development methodologies.

Key Responsibilities and Achievements:

Developed and implemented robust backend and database solutions using C# and SQL in collaboration with cross-functional teams, adhering to project timelines and quality standards.

Utilized our proprietary NF tool to streamline development processes, improve data management, and enhance application functionality.

Actively participated in team meetings and contributed innovative ideas to improve project efficiency and code quality.

Technical Skills:

Backend Development: C#, SQL

Proprietary Tools: NF tool

Version Control: Git, GitHub

Development Tools: Visual Studio, SQL Server Management Studio

Methodologies: Agile, Scrum, Software Development Life Cycle (SDLC)

Professional Skills:

Strong analytical and problem-solving capabilities for debugging, optimizing queries, and feature enhancement.

Effective communication skills to coordinate with internal stakeholders and external clients.

Demonstrated ability to work independently and collaboratively in team-based environments.

Education

- **Kings Engineering College** 2019
BE - Computer Science
62
- **Pope Memorial Hr. Sex. School** 2015
HSC
69%

Skills

- Web Development (HTML, CSS, JavaScript)
- C# , SQL server

Projects

- **Poise Accounting**

Company: Maruti Computer Pvt Ltd

Duration: March 2022 - Present

Role: Software Developer (C# and SQL)

Description:

Developed backend features and database solutions for Poise Accounting's internet-based, web-enabled financial GST software catering to small and large firms. The software aimed to enhance operational convenience and streamline accounting processes.

Key Technologies Used:

C#: Developed robust backend services and business logic to support accounting workflows and financial operations.

SQL Server: Designed and optimized database schemas, queries, and stored procedures for reliable and efficient data management.

NF Tool: Utilized proprietary NF tool to automate and optimize software development processes and enhance application capabilities.

Tools Utilized:

Visual Studio: Used Visual Studio for coding, debugging, and integration with version control.

SQL Server Management Studio (SSMS): Managed databases, wrote T-SQL queries, and performed performance tuning.

GitHub: Managed codebase on GitHub for version tracking, collaboration, and code reviews.

- **CRM(Sales & Marketing)**

Company: Maruti Computer Pvt Ltd

Duration: 16/02/2021 to 20/03/2022

Role: Full Stack Developer

Description:

Contributed to the development of a comprehensive Customer Relationship Management (CRM) software tailored for printing companies. The software facilitated efficient management of customer relationships and streamlined operations within the printing sector.

Key Technologies Used:

C#: Developed backend logic and business logic using C# for robust functionality and integration capabilities.

SQL Server: Designed and maintained relational databases on SQL Server for storing and managing critical data such as inventory details and customer information.

Tools Utilized:

Visual Studio: Leveraged Visual Studio as the primary Integrated Development Environment (IDE) for C# development, providing a suite of tools for code editing, debugging, and deployment.

SQL Server Management Studio: Used SSMS for database development, management, and querying, ensuring data integrity and performance optimization.
